

I benefit from XM Satellite Radio's Instant Traffic & Weather broadcasts. I regularly listen to these reports from my home area and those to which I plan to travel, especially while I'm on my way to the airport. In addition, it let's me keep in touch with the goings on in my parent's home area. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB petition 04-160 and to support XM's ability to provide me the the kind of programming I demand and deserve.
Respectfully,

Kevin P. Chance
Saratoga, CA
